Attachment 2E**Certification As To The Prices For Determining Prices For Applicable
Negotiated Service Agreements Under
Priority Mail International Regional Rate Boxes - Non-published Rates**

I, Virginia Mayes, Manager, Cost Attribution, Finance Department, United States Postal Service, am familiar with the prices that establish the price floor and the price ceiling for negotiated service agreements under the Priority Mail International Regional Rate Boxes - Non-published Rates product grouping, which are presented in Attachment 2D. I am also familiar with the methodology described in Attachment 2C for determining the prices for customer-specific agreements. The prices contained in this filing were established in accordance with the Decision of the Governors of the United States Postal Service on the Establishment of Prices and Classifications for Domestic Competitive Agreements, Outbound International Competitive Agreements, Inbound International Competitive Agreements, and Other Non-Published Competitive Rates, issued March 22, 2011 (Governors' Decision No. 11-6), which established prices by means of price floor formulas.

I hereby certify that these prices are determined in a manner that satisfies applicable pricing criteria, using appropriate and accurate data. If the Postal Service were to enter into agreements and offer services that set prices at or above the price floors using the methodology described in Attachment 2C, the Postal Service would be in compliance with 39 U.S. C. § 3633(a)(1), (2) and (3). The minimum prices that establish the price floor and the methodology for determining the rates for individual customers provide that the agreements under Priority Mail International Regional Rate Boxes - Non-published Rates should cover the product grouping's attributable costs, based on a distribution of assumed customer volumes, and preclude the subsidization of competitive products by market dominant products. Even if all the agreements under Priority Mail International Regional Rates Boxes - Non-published Rates were assigned prices at the price floor for the corresponding downstream access option, the prices and methodology used should prevent the product group from impairing the ability of competitive products on the whole to cover an appropriate share of institutional costs.
